DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

The PTOL 1449s of 08/17/2006 and 04/30/2008 have been received, reviewed and considered.

Response to Arguments

2. Applicant's arguments, see the remarks, filed 03/27/2008, with respect to claims 1-14 and 16-19 have been fully considered and are persuasive. The 112, 2nd paragraph rejection of claims 2, 8, 11, 12, and 33 have been withdrawn. The non-statutory obviousness-type double patenting rejections of claims 1-14 and 16-19 have been withdrawn.
3. The examiner is making a note to the applicants that the best prior art of record is that of Japanese Application No. 2004-300024, The Society of Chemical Engineers handbook and Kawamura, et al reference "Growth of Transparent, Large Size GaN Single Crystals with Low Dislocations Using Ca-Na Flux Systems" which should have been cited in a reasons for allowance in the first office action of 12/28/2007. This notice is to clarify the record that the documents cited supra have been thoroughly reviewed and considered by the examiner after carefully reading the Written Opinion by the examiner at the European Patent Office.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance. The prior art of record does not teach nor render obvious the instantly claimed invention. There is no teaching in the art to perform the process that is now claimed. The prior art of JP '024 A does teach a method for growing a Group III nitride crystal from a melt including an alkali metal, wherein the melt is stirred with a propeller for several hours to mix Ga and Na in the melt. JP '024 teaches various means for stirring a liquid while Kawamura, et al teaches a method for growing a Group III nitride crystal from a melt including an alkali metal, wherein the template is placed substantially upright in a crucible. However, none of the prior art references teach a method for growing a Group III nitride crystal, wherein a crystal is grown at the time of stirring the melt, as stated in the instant invention. There is no motivation in the art to change the prior arts' teaching of to arrive at the instantly claimed process.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
